

VTEL Distance Education

Expanding the reach of new ideas. Increasing productivity. Since 1986, VTEL's PC integrated videoconferencing systems have provided easy-to-use tools tailored for training and distance learning applications.

Today, classrooms and training facilities can extend across states and over oceans. Thousands of educators have chosen VTEL videoconferencing technology because we've designed our products knowing that learning is the real goal – technology simply supports it.

VTEL offers turnkey classroom packages for use in training facilities, government agencies, and educational institutions from primary/secondary to colleges and universities. Every component of the packages has been carefully selected to make the classroom comfortable and effective for both students and instructors.

- Complete, easy-to-order classroom systems
- Enhance with custom options and peripherals
- Many VTEL products are E-Rate eligible
