

VTEL Mobile Classroom System

20th Anniversary Distance Learning System

VTEL's 2-in-1 integrated multimedia solution is the only teaching tool you need!

Multimedia Presenter + Videoconferencing System = All-in-One Solution

Projector

Wireless Keyboard

PC with IP connection to Internet and school LAN

VTEL's Mobile Classroom System is a local presentation system with a PC and projector integrated into a lightweight, moveable cart.

Local Presentation Mode

Integrated PC:

- Show PowerPoint slides
- Access the Internet or teaching materials via school LAN

Built-in LCD projector:

- Project large, bright pictures for everyone to see

Wireless Keyboard:

- Enjoy wireless control from anywhere in the classroom

Accessory space:

- Play a DVD or VCR clip with user provided DVD/VCR player

eBeam Whiteboard Module

Vista™ IP Videoconferencing System

Ready to get totally interactive? The Mobile Classroom System also has an integrated videoconferencing system ready to plug into your school's IP network.

Simple Videoconferencing Mode

Complete videoconferencing system with pan-tilt-zoom camera and microphone:

- See, hear, and interact with remote students or guest speakers
- Take a virtual field trip to NASA or the Monterey Bay Aquarium without leaving the classroom

eBeam Whiteboard Solution:

- Turn an ordinary whiteboard into a touch-sensitive screen and get both local and remote students out of their seats and actively participating (drawing, writing, calculating)

Say good-bye to heavy monitors and cabinets and hello to a safer, mobile solution!

Bundle everything into a mobile cart that is lightweight and secure, and you have the ultimate distance learning tool.

All-in-One Integrated Solution

Compact, secure cart with locking wheels:

- Teachers have ample workspace on this mobile cart that is safe and easy to move between classrooms

Integrated Advanced Audio:

- Two speakers and a sub-woofer create robust audio

Fully-Integrated Components:

- Components are locked in place so nothing "walks" off
- Video system with integrated PC, projector, camera, and microphone come pre-cabled
- All you need is one power outlet and one IP connection!
