

TouchPoint Camera Control System

TouchPoint Locator Button(s)

Place from one to nine wireless Locator Buttons in a classroom or conference room and tap any button to instantly call the VTEL HD5000PTZ camera to that location with absolute precision.

TouchPoint

The TouchPoint Camera Control System requires no technical knowledge to set up. There are no drivers to download and no software to install. Simply place up to nine Locator Buttons in your room and tap any button to have the camera go to that location. The Locator Buttons correspond exactly to the preset positions that you select for your camera using the camera's hand-held remote control. You can change the preset positions in moments at any time you choose.

The list price of each TouchPoint Locator Button is \$95.

The list price of the VTEL HD5000PTZ camera is \$695. It is a 1080p HD Pan/Tilt/Zoom (10x optical) videoconferencing camera with USB video output, ten preset positions, and UVC camera control protocol.
